

## Practical Treatment for your Spent Caustic Challenges

Every kind of spent caustic generated from :

### Petrochemical

- Ethylene Plant
- PDH Plant

### Refinery

- Merox Unit
- Isomerization Unit
- DHDT and Hydrocracker Unit
- Propylene Recovery Unit
- Gasoline / Jet / Kerosene / LPG treating Unit

We use our specific solvents based on your case to extract contaminant from caustic

We could improve quality of your effluent by removing any solid and undesirable oils

We adjust PH to transfer spent caustic to waste water treatment pools

We also utilize different oxidation methods based on plant situation and contaminant to get proper COD
